

HomeLike Solutions, LLC, Completes Latest Project
Residents at California-based Monte Vendra Grove Homes feel more at home after recent upgrades

TAMPA, FLORIDA, SEPTMEBER 2, 2017 - The HomeLike Solutions, LLC, team recently announced the completion of a project that took place at Monte Vendra Grove Homes in Pasadena, California. HomeLike Solutions, LLC, upgraded the MVGH skilled nursing facility's accommodations from standard nurse call lights to decorative sconces with the same function.

HomeLike Solutions, LLC, works with long term care communities to create atmospheres that put residents and their families at ease by de-institutionalizing accommodations.

MVGH has 40 residences within its skilled-nursing facility, also known as The Health Center, where patients receive rehabilitative, custodial, respite, and hospice care.

"The new nurse call sconces enhanced the appearance of our halls. These little changes can have a big impact on how the facility feels," said Deborah Herbert, Executive Director at MVGH.

Kevin Bergmann, Co-Founder at HomeLike Solutions, LLC, said, "The sconce lenses can be installed in conjunction with new nurse call systems, and they can be designed to be retrofitted over older systems to give a home-like feel."

By creating less institutionalized environments, HomeLike Solutions, LLC, is partnering with long term care facilities across the nation to increase resident morale and quality of life.
